<u>APPENDIX 2</u>	28
TVSF OBJECTIVES AND PHASES	29
DESCRIPTION OF THE REVIEW PROCESS	30

1) Executive Summary

Redwood is a Columbus, Ohio based LLC founded by former Battelle executives over 11 years ago. Redwood has assembled an extraordinary team for this Program. Each member of the six-person Redwood team is an accomplished technology commercialization professional with decades of experience in performing business and technical evaluations. This team, combined with identified external subject matter experts, has extensive experience in all six of the Ohio Third Frontier technology focus areas. More detail on the Redwood team is provided in Appendix 1 of this report and on our website (www.Redwdinnnov.com). Details of the TVSF program and the review process are provided in Appendix 2.

Round 39 is the fifth round to introduce a \$200,000 TVSF Phase 2 application process with up to 20% of the funding allowed for personnel. This was a Phase 2 only round. Fifteen (15) TVSF Round 39 Phase 2 applications were received. One did not meet the TVSF requirements and was asked to withdraw. Fourteen (14) applications totaling \$2,785,200 were reviewed. Funding is recommended for 7 Phase 2 applications for a total of \$1,400,000. Funding is not recommended for 7 Phase 2 applications for a total of \$1,385,200. This translates to a 50% recommended application funding rate for this TVSF round, compared to the average of 51% over all 39 TVSF rounds.

2) Evaluation Results

Summaries of the evaluations of the proposals and funding recommendations are shown in Table 1. Questions were submitted to applicants to answer prior to conducting video interviews. The total recommended funding for Phase 2 projects is \$1,400,000. Note that the Table 1 column widths are proportional to the weighting of the evaluation criteria. For example, in Table 1, Management Team which is weighted at 20 is four times as wide as ESP Interaction which is weighted at 5. Note that a yellow evaluation indicates that the proposal meets that particular criterion.

More detailed evaluations and recommendations for each Phase 2 proposal may be found in Section 3 of this report.

TECHNOLOGY VALIDATION AND STARTUP FUND

Table 1 – Phase 2 Proposal Evaluation and Funding Recommendation

Table 1
Phase 2 Proposal Evaluation and Funding Recommendation
TVSF Round 39

Proposal Number	Lead Applicant	Requested Funding (\$1,000)	Recommended Funding (\$1,000)	Team	Opportunity/Market Size	IP Protection	Proof of Concept	Potential Investor & Business Partner Engagement	Business Model	Project Plan/Budget Narrative	Growth Plan in Ohio	ESP Interaction

FY25-1853	WaterWise Technologies LLC	200,000	0									
	Sub-Total, \$	1,385,200	0	Column width is proportional to score weighting in each category								
	Total, \$	2,785,200	1,400,000									
Evaluation Scale				Weak	Meets	Exceeds						

Table 2 lists the funding approval rate by TVSF round. This round's approval rate is 50% of the total reviewed proposals. The historical range of individual rounds has spanned 27% – 100%, with an average of 51%.

TECHNOLOGY VALIDATION AND STARTUP FUND

Table 2. TVSF Approval Rate by Round

TVSF Round 39						
Approval Rate by Round						
Phase 1/Phase 2						
Round	\$ Recommended	Approval Rate		Round	\$ Recommended	Approval Rate
1 (APR 2012)	\$950,000	35%		20 (NOV 2019)	\$1,350,000	43%
2 (AUG 2012)	\$900,000	52%		21 (FEB 2020)	\$3,944,000	56%
3 (DEC 2012)	\$610,000	44%		22 (JUN 2020)	\$1,398,630	53%
4 (JUN 2013)	\$864,000	30%		23 (DEC 2020)	\$900,000	50%
5 (FEB 2014)	\$1,462,000	46%		24 (MAR 2021)	\$2,092,900	55%
6 (JUN 2014)	\$998,000	39%		25 (JUN 2021)	\$800,000	75%
7 (OCT 2014)	\$1,100,000	57%		26 (OCT 2021)	\$1,700,000	55%
8 (FEB 2015)	\$710,000	37%		27 (FEB 2022)	\$850,000	43%
9 (JUN 2015)	\$550,000	31%		28 (APR 2022)	\$2,499,976	64%
10 (DEC 2015)	\$925,000	38%		29 (JULY 2022)	\$850,000	100%
11 (APR 2016)	\$1,239,000	46%		30 (OCT 2022)	\$3,700,000	71%
12 (OCT 2016)	\$3,537,269	46%		31 (JAN 2023)	\$100,000	50%
13 (MAR2017)	\$1,567,500	38%		32 (APR 2023)	\$850,000	64%
14 (SEP 2017)	\$498,832	27%		33 (JULY 2023)	\$1,100,000	73%
15 (DEC 2017)	\$2,250,000	38%		34 (OCT 2023)	\$250,000	33%
16 (MAR 2018)	\$2,098,600	52%		35 (JAN 2024)	\$800,000	59%
17 (SEP 2018)	\$2,100,000	42%		36 (APR 2024)	\$2,650,000	80%
18 (DEC 2018)	\$1,150,000	35%		37 (JULY 2024)	\$1,798,000	82%
19 (APR 2019)	\$2,250,000	43%		38 (OCT 2024)	\$6,475,000	65%
				39 (JAN 2025)	\$1,400,000	50%
				Total Funding	\$61,268,707	
				Average/Round	\$ 1,570,992	51%

3) Proposal Summaries

Proposal Summaries - Phase 2 Recommended for Funding

Proposal 25-1841	Checkmate AI Holdings, Inc	Amount Requested: \$200,000
<i>Licensing Institution</i>	Research Institute at Nationwide Children's Hospital	Amount Recommended: \$200,000
Prior Phase 1 Applications: Yes	Prior Phase 2 Applications: No	<i>Improving Elderly Medication Adherence with Checkmate AI</i>
Software/ Information Technology		Entrepreneurs' Center/Rev1

Company Snapshot: Checkmate leverages AI to empower seniors to live independently while improving care, reducing costs, and enhancing well-being, by engaging patients through interactive calls or texts to remind them of medications and notify them of appointments.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
G	Management Team	Strong team of three co-founders with complementary fundraising, technical, business and entrepreneurial experiences and expertise.
Y	Opportunity/Market Size	Initial market is identified - Medicare Advantage companies, and quantified in answers to interview questions. TAM is over \$8B and SOM is over \$94M at an estimated 3% share of SAM.
Y	Intellectual Property Protection	Software is proprietary. Licensing terms have been negotiated with Nationwide Children's Hospital and the company is prepared to execute upon award.
G	Proof of Concept	Current alpha unit has demonstrated the ability to conduct conversations with users (TRL3). Beta anticipates adding daily health check-ins, medication reminders, and caregiver updates.
G	Potential Investor/ Business Partner Engagement	Founders have strong relationships with angel groups and other investors through past startup experiences.
Y	Business Model	The business model will initially target B2B Medicare Advantage organizations seeking to raise their HEDIS scores.
Y	Project Plan/ Budget Narrative	The project plan/budget narrative are consistent with MVP in 12 mo.
G	Growth Plan in Ohio	Checkmate plans to add 20 positions by 2029 and \$29M in revenue.
Y	ESP Interaction	Engaged with 2 ESPs that have provided complementary guidance.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: The Checkmate founders have strong connections within the medical community and past successful exits in similar markets. The opportunity is large and the alpha unit was demonstrated. The founders have connections within the investment community from past experiences and have developed a strong growth plan in Ohio. This application is recommended for funding.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1842	ComfortCath L.L.C.	Amount Requested: \$200,000
<i>Licensing Institution</i>	University of Cincinnati	Amount Recommended: \$200,000
Prior Phase 1 Applications: No	Prior Phase 2 Applications: No	<i>Revolutionizing Urinary Retention Care for Women</i>
Biomedical/ Life Sciences		Entrepreneurs' Center

Company Snapshot: ComfortCath™ is addressing a critical, unmet need for women with chronic urinary retention (CUR), who suffer from discomfort, infections, and a diminished quality of life due to outdated catheter options.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
G	Management Team	Physician inventor and experienced medical device manager as CEO. CEO has a track record of highly successful med device product development and multimillion dollar exits.
G	Opportunity/Market Size	324,000 patients, representing a potential market of \$1.18 billion.
Y	Intellectual Property Protection	Licensing option agreement is in place between University of Cincinnati and ComfortCath covering a PCT application.
Y	Proof of Concept	ComfortCath has a prototype that demonstrates core technology. TVSF funded project will finalize design and prep for regulatory submission.
G	Potential Investor/ Business Partner Engagement	Through CEO connections, conversations with potential women's health-centered and other investors have already occurred.
Y	Business Model	Plans and timelines are reasonable. Proforma is well-developed. Proposed timeline for market entry by mid-2027.
Y	Project Plan/ Budget Narrative	Milestones are clearly stated and reasonable for the timeframe/cost.
Y	Growth Plan in Ohio	Commitment to grow business and technical staff in Ohio.
G	ESP Interaction	Active engagement with the Entrepreneurs' Center.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: The proposal clearly explains the technology, opportunity, and approach. Highly experienced CEO with successful track record is engaged and enthusiastic. Regulatory and business development plans are clear and achievable. Conversations with potential follow-on investors are in progress. Clinical testing is a key milestone. This application is recommended for funding.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1844	Immobileyes Inc.	Amount Requested: \$200,000
<i>Licensing Institution</i>	US Navy	Amount Recommended: \$200,000
Prior Phase 1 Applications: No	Prior Phase 2 Applications: No	<i>LUMALERT Personal Safety Device with Unique Tracking Ability</i>
Software/ Information Technology		Entrepreneurs' Center

Company Snapshot: LUMALERT proposes to build a device to improve personal safety by integrating disorienting strobing lights for enhanced attacker deterrence, provide a high-intensity alarm system and an independent location tracking.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
G	Management Team	A well-balanced Team with proven track record in early-stage commercialization, fund raising and marketing. Also has advisory board with relevant manufacturing capabilities.
Y	Opportunity/Market Size	The global TAM market \$ 3B/ yr with 6.6% CAGR. US market about \$ 1B/yr.
Y	Intellectual Property Protection	Negotiating with Techlink to acquire the Tracking IP to integrate with their HALAR technology covered in 2 issued patents.
Y	Proof of Concept	The licensed Navy technology is TRL 4 and the HALAR technology to be integrated with is at TRL 8. Early results from testing look encouraging.
G	Potential Investor/ Business Partner Engagement	Active engagements with potential investors and non-dilutive funding. Discussion with Angel group for seed funding of \$500 K in 2025.
G	Business Model	A well laid plan with projected revenue of \$36.8 M in year 5 from direct and channel sales and subscription sources.
Y	Project Plan/ Budget Narrative	A well laid out project plan and realistic deliverables.
Y	Growth Plan in Ohio	30 staff in 5 years.
Y	ESP Interaction	Working closely with Entrepreneur Center.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
-------------------------	-------------	--------------	----------------

Comments and Recommendations: The proposal is recommended for funding. A very well- balanced Team with proven expertise/track record in technology development/commercialization and fund raising. Active participation by leading end users/producers of the target products. Market opportunity and entry strategy with long term growth plans are quite credible.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1845	MetaMol Theranostics	Amount Requested: \$200,000
<i>Licensing Institution</i>	University of Cincinnati	Amount Recommended: \$200,000
Prior Phase 1 Applications: Yes	Prior Phase 2 Applications: No	<i>A New Assessment Tool for Breast Cancer Risk</i>
Biomedical/Life Sciences		Entrepreneurs' Center

Company Snapshot: MetaMol Theranostics proposes to bring a specific and selective indicator of breast cancer to market as a diagnostic device.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
Y	Management Team	Successful academic founder who successfully completed TVSF Phase 1 project. Other experienced scientific members on the core team are supported by a cadre of qualified and committed business advisors and coaches.
Y	Opportunity/Market Size	Immediately addressable market (breast cancer) is estimated at \$640M.
Y	Intellectual Property Protection	One issued patent. Letter of support states intent to license exclusively in the project's field.
Y	Proof of Concept	The test developed during TVSF Phase 1 project provides solid foundation to advance the product to FDA 510(k) application.
G	Potential Investor/ Business Partner Engagement	Many detailed conversations with potential investors, strategic, venture and angel.
Y	Project Plan/ Budget Narrative	Straightforward project plan uses appropriate Ohio-based vendors, and is achievable in the timeframe and budget proposed.
Y	Business Model	Company will follow strategic licensing approach to market revenues.
Y	Growth Plan in Ohio	Stated commitment to grow in Ohio.
G	ESP Interaction	Frequent interaction with Entrepreneurs' Center.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: MetaMol seeks to advance a well-developed cancer diagnostic and prognostic maker from its current status to an FDA-approved test. The clinical utility of the test has been clearly shown in journal publications, and has great promise to be successful in the market. The proposed project is straightforward and appropriate, and uses Ohio-based vendors. The scientific/clinical team should continue to work closely with the business support team they have in place. This application is recommended for funding.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1847	Parcell Company	Amount Requested: \$200,000
<i>Licensing Institution</i>	Air Force Research Laboratory	Amount Recommended: \$200,000
Prior Phase 1 Applications: No	Prior Phase 2 Applications: 23, 24, 38	<i>Parcell Integrated Tracking System</i>
Software/ Information Technology		Entrepreneurs' Center

Company Snapshot: Parcell Company provides a secure data communication capability for industrial hardware devices, enhancing both efficiency and cybersecurity.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
G	Management Team	Team has a good combination of technical skills, entrepreneurial experience and market engagement. A government contracting sales specialist will be added to the team in 2025.
Y	Opportunity/Market Size	Market in US Department of Defense is estimated at \$300M. Initial target market is the US Air Force.
G	Intellectual Property Protection	In licensing discussion with USAF. A robust strategy to create further IP barriers is described.
G	Proof of Concept	Proof of concept is well conceived. Two prospective USAF customers have agreed to provide pilot demonstration specifications.
Y	Potential Investor/ Business Partner Engagement	Two principals have raised funds in the \$3M to \$10M range and have a network of potential investors. No business partners mentioned.
Y	Business Model	Business model is reasonable. Ultimately a combination of product sales (DoD) and licensing (commercial).
G	Project Plan/ Budget Narrative	Project plan is clear and reasonable featuring proven vendors.
G	Growth Plan in Ohio	Clear commitment to grow in Ohio is demonstrated.
G	ESP Interaction	Significant, long term ESP engagement has occurred.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
-------------------------	-------------	--------------	----------------

Comments and Recommendations: This application is recommended for funding. The management team is well qualified to pursue this opportunity. Round 38 concerns regarding market and business model have been addressed.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1848	Ravee Optics Limited	Amount Requested: \$200,000
<i>Licensing Institution</i>	Air Force Research Laboratory	Amount Recommended: \$200,000
Prior Phase 1 Applications: No	Prior Phase 2 Applications: Yes	<i>Infrared optics for drone sensing</i>
Advanced Materials		Entrepreneurs' Center

Company Snapshot: Ravee Optics has developed and demonstrated a new process to manufacture high performance lenses domestically and with readily available materials that can reduce the bulk and cost of thermal imagers making them especially suited to use in drones, small vehicles, and handheld systems.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
G	Management Team	A strong technical Team with relevant fund raising / commercialization experience through addition of an advisor. Working with fabs for scale up and manufacturing needs.
Y	Opportunity/Market Size	Projected at over \$500M/yr with CAGR of 19%.
Y	Intellectual Property Protection	Provisional patent applications filed and expect to get exclusive license in the field from AFRL.
Y	Proof of Concept	TRL of 6 with AFRL funded project and successful demonstration.
G	Potential Investor/ Business Partner Engagement	Has started engaging potential partners and investors.
Y	Business Model	\$40 M sales projected in 2028—perhaps optimistic. Projecting equity funding needs of \$3 M.
Y	Project Plan/ Budget Narrative	Seems reasonable, well laid out. TRL is expected at 9 after TVSF.
Y	Growth Plan in Ohio	8 FTEs projected in 2028, \$40 M revenues in 5 years.
G	ESP Interaction	Very strong and active participation with ESP.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: This application is recommended for funding. Significant additions made to the Team in the areas of fund raising, potential partner engagements, discussions with Fabs for scaleup and manufacturing since the prior submission in Round 37. Significant technical progress also made to further enhance the TRL. The Team is encouraged to work closely with BAE, Leidos and others to aggressively push for commercialization.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1851	UP Biochemicals	Amount Requested: \$200,000
<i>Licensing Institution</i>	Ohio State University	Amount Recommended: \$200,000
Prior Phase 1 Applications: No	Prior Phase 2 Applications: No	<i>Conversion of Dextrose to Specialty Chemicals</i>
Advanced Materials		JumpStart/ BRITE Energy

Company Snapshot: UP Biochemicals has developed catalyst technology to convert corn dextrose to specialty chemicals. The process cuts carbon emissions and benefits Ohio Agriculture if validated. This project will validate the process and provide samples of products to end users.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
Y	Management Team	A well- balanced Team with proven track record in early-stage technology development, commercialization and prior fund-raising experience. Lacks production/ manufacturing/ plant/ sales and marketing staff.
G	Opportunity/Market Size	TAM many billion dollars per year; SAM for adipic acid, the first target molecule, is over \$5 B/yr
Y	Intellectual Property Protection	3 WO patents; several provisional patents underway. Negotiating with the Ohio State Univ for licensing.
Y	Proof of Concept	TRL 3 based on early lab results. Additional data shared after the interview seems to show improved stability/ selectivity of the catalyst compared to prior failed attempts by other groups.
Y	Potential Investor/ Business Partner Engagement	Too early for serious investor/ partnership discussions and has contacts with potential partners.
Y	Business Model	Well laid out 3 phase approach with investment needs identified - \$1.5 M in PreSeed; \$3 M 2026; Ser A & Ser B of \$16 M and \$55M.
Y	Project Plan/ Budget Narrative	Seems reasonable to reach next step in the process.
Y	Growth Plan in Ohio	50 jobs created in 2029.
Y	ESP Interaction	Working with regional ESP.
	Evaluator Recommendation	This application is recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: The application is recommended for funding. A very strong technical Team with expertise in catalysis, prior fund raising and partnership engagements. Early lab data seems to show the proposed catalyst system has improved stability/ selectivity compared to the prior art attempts. The Team is strongly encouraged to focus on clearly demonstrating the improvements in their catalyst technology in Tasks 1 and 2 prior to engaging with potential partners.

Proposal Summaries - Phase 2 Not Recommended for Funding

Proposal 25-1839	A.M. ToolBox LLC	Amount Requested: \$200,000
<i>Licensing Institution</i>	Naval Surface Warfare Center - Carderock	Amount Recommended: \$0
Prior Phase 1 Applications: No	Prior Phase 2 Applications: 38	<i>Light Weight Bio-Metric Body Armor</i>
Advanced Materials		Entrepreneurs' Center

Company Snapshot: A.M. ToolBox LLC is proposing to develop and market a lower cost, lighter weight ballistic protection body armor while maintaining high user agility.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
R	Management Team	One member has experience in AM technology, two members are listed as attorneys. Limited experience in design of armor components demonstrated, no demonstrated experience in relevant fund raising.
R	Opportunity/Market Size	Development combines novel ballistic material with AM to produce complex shaped protective armor. US market size for body armor identified. TAM for body shaped armor not given.
R	Intellectual Property Protection	Negotiating exclusive rights to Patent #8105510 expiring ~ November 2030. Manufacturing technology based on experience.
R	Proof of Concept	Base material has demonstrated TRL 6, MVP for Bio-metric curve product should be available within 12 months. No evidence of customer input on metrics, stated metrics are general market forces.
R	Potential Investor/ Business Partner Engagement	No details of any discussions with investors have been provided.
R	Business Model	Traditional sales & marketing strategy. No plan to address barriers to entry. Future development relies on Phase 2 SBIR.
Y	Project Plan/ Budget Narrative	Plan/budget are aggressive. ~50% of funds for new equipment.
Y	Growth Plan in Ohio	Indicate creation of 25 jobs in Central Ohio.
Y	ESP Interaction	Interacting with The Entrepreneurs' Center.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
-------------------------	-------------	--------------	----------------

Comments and Recommendations: Demonstration of the management team's capabilities to meet critical roles and responsibilities will greatly improve the potential for success. The specific market focus and size relevant to the technology and product need to be clearly identified and quantified. This will enable the team to develop a clear identification of the product performance levels required to demonstrate success in meeting quantifiable market demands and delineation of appropriate marketing and sales strategies for commercialization.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1840	Avionova LLC	Amount Requested: \$200,000
<i>Licensing Institution</i>	UC Davis	Amount Recommended: \$0
Prior Phase 1 Applications: No	Prior Phase 2 Applications: No	<i>Cryotherapy Based In-Flight Vestibular Stabilization for Spatial Disorientation Mitigation in Airmen</i>
Biomedical/ Life Sciences		Entrepreneurs' Center

Company Snapshot: Avionova LLC is developing a noninvasive technology designed to help pilots maintain balance during flight, addressing one of the primary causes of aviation accidents related to spatial disorientation (SD).

Rating (R/Y/G)	Category	Highlights/Issues/Comments
R	Management Team	The founder is an impressive young person who has direct experience in the target market. Unfortunately, the team lacks significant product development and entrepreneurial experience.
Y	Opportunity/Market Size	The initial aviation markets plus the consumer vertigo and motion sickness markets are attractive.
Y	Intellectual Property Protection	One patent (US 11,248,107) and one application (16/952,798) are under discussion for licensing from UC Davis.
R	Proof of Concept	Product schematic drawings are done. A laboratory proof of concept / MVP has not been done to support the claimed TRL 4. The active cooling material has not been identified.
R	Potential Investor/ Business Partner Engagement	Introductory discussions with prospective investors have occurred. It will be hard to progress these discussions without an MVP.
Y	Business Model	The staged market entry plan, beginning with military aviation, is well considered. Initial military adopters are identified.
R	Project Plan/ Budget Narrative	The project plan and associated budget are overly optimistic.
G	Growth Plan in Ohio	The commitment to growing the company in Ohio is clear.
G	ESP Interaction	Significant interaction has occurred with the Entrepreneur's Center.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: The market and the product concept targeted by the company are attractive. The product at this point is conceptual and too early for TVSF funding. The founder is encouraged to add significant product development and entrepreneurial experience to the team.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1843	ComHealth Data Solutions LLC	Amount Requested: \$200,000
<i>Licensing Institution</i>	Cleveland State University	Amount Recommended: \$0
Prior Phase 1 Applications: Yes	Prior Phase 2 Applications: No	CHW Digital Data Platform
Software/ Information Technology		Entrepreneurs' Center

Company Snapshot: The i-Hope platform is an intuitive community electronic data collection platform to eliminate paper-based data collection for community health workers (CHW), allows for data exchange between clinics and facilitates longitudinal tracking and collaboration.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
Y	Management Team	The team has an attractive combination of public health and entrepreneurial experience. However, the team did not seem well synchronized during the interview.
R	Opportunity/Market Size	A credible description is given of a \$180M total market. This market is highly fragmented and clear plans to capture the market were not provided.
Y	Intellectual Property Protection	Patent application 17/072,984 is the subject of licensing negotiations. The team is hopeful that patent issue will occur soon.
G	Proof of Concept	The combination of prior work and the project outcomes will provide a strong proof of concept.
G	Potential Investor/ Business Partner Engagement	The team has a strong history of raising money and there is good engagement with initial adopters.
R	Business Model	The value proposition at the site and community-based organizations is poorly defined.
Y	Project Plan/ Budget Narrative	Project plan and budget are well considered and appropriate.
Y	Growth Plan in Ohio	The application provides a clear Ohio based growth narrative.
Y	ESP Interaction	Several meetings have occurred with the Entrepreneurs Center.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: This application targets a product for an important, underserved public health market. The team appears to be very recently assembled and the customer value proposition is not well defined. These items should be addressed prior to a reapplication by ComHealth.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1846	MiniOrtho Inc.	Amount Requested: \$200,000
<i>Licensing Institution</i>	University of Toledo	Amount Recommended: \$0
Prior Phase 1 Applications: Yes	Prior Phase 2 Applications: No	<i>Syndesmotic Ankle Fracture Fixation and Reconstruction System</i>
Biomedical/Life Sciences		Regional ESP: Jumpstart, UT Business Incubator

Company Snapshot: MiniOrtho plans to commercialize a patented device, the syndesmotic ankle fracture fixation and reconstruction system (SAFFRS) designed to simplify the treatment of syndesmotic ankle fractures.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
R	Management Team	Technically strong academic team with inadequate business experience and support. Team lacks medical device business development, regulatory and fundraising experience.
Y	Opportunity/Market Size	Product could address unmet clinical needs in ankle fixation. Market size was approximately \$157M in 2022.
Y	Intellectual Property Protection	Licensor agrees to negotiate for one issued US patent if funding is obtained.
R	Proof of Concept	No working prototype exists. The company has drawings and a 3D printed model. TVSF-funded work might result in a viable prototype but it's uncertain at this very early stage.
R	Potential Investor/ Business Partner Engagement	Early conversations with potential investors or strategic partners are not meaningful at this early stage. Propose to get SBIR after TVSF.
R	Business Model	Propose to manufacture and sell the devices directly, or partner. Proforma provided is inadequate. Near-term funding is absent.
R	Project Plan/ Budget Narrative	Plan is reasonable for tech stage. Not likely to attract investment.
Y	Growth Plan in Ohio	Company is registered with the Ohio Secretary of State.
R	ESP Interaction	Insignificant interaction with U Toledo Business Incubator.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
-------------------------	-------------	--------------	----------------

Comments and Recommendations: MiniOrtho presents a possible approach to an unmet medical need. However, the technology is too immature and business leadership is not adequate, especially lacking medical device business development and fundraising experience. The business strategy is poorly developed and lacks proforma estimates. The founders should seek guidance from ESP and others, and bring in experienced business leadership. The technology may need to be advanced using other funds to be mature enough for TVSF. This proposal is not recommended for funding.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1849	SimulationAI LLC	Amount Requested: \$185,200
<i>Licensing Institution</i>	Ohio State University	Amount Recommended: \$0
Prior Phase 1 Applications: No	Prior Phase 2 Applications: No	<i>Software Simulating the Physical Behavior of Objects</i>
Software/ Information Technology		Entrepreneurs' Center

Company Snapshot: SimulationAI intends to eliminate manual steps in simulation software tools using an AI deep learning model to provide accurate answers in a fraction of the time it currently takes.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
R	Management Team	One of the founders has led the development of the technology; the other has been involved with early-stage company development. Current experience with fund raising is limited to success with Federal grants.
R	Opportunity/Market Size	Overall market size identified as \$0.7B, the TAM for the software in its current formulation and benefit has not been identified. In its current capability the TAM is considerably less than \$0.7B.
Y	Intellectual Property Protection	Provisional patent filed by OSU in 2023. International patent #103361-468WO1 filed April 2024. Freedom to operate search conducted to confirm differentiation from competitor products.
R	Proof of Concept	Current product has limited functionality. Development and customer testing needed to confirm target market and identify performance metrics. Funds are requested from the Federal STTR program.
R	Potential Investor/ Business Partner Engagement	Federal funding may open opportunities for commercial involvement. VC support planned in 2026, no discussions with investors reported.
R	Business Model	Refinement needed to achieve stated business aspirations.
Y	Project Plan/ Budget Narrative	Achievable but unlikely to provide the required commercial product.
Y	Growth Plan in Ohio	Projected to develop \$15M revenue and 42 jobs.
Y	ESP Interaction	Engaged with The Entrepreneurs' Center and Rev 1.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
------------------	------	-------	---------

Comments and Recommendations: The management team would be strengthened by the addition of members with demonstrated success in fund-raising fund. Long-term development of the product may require additional support above that currently proposed. The addressable market size for the product needs to be clearly matched to the functionality of the product available at the appropriate stage in its development. Consideration should be given to market entry given the level of competition and switching costs of existing legacy software codes.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1852	Volynt Aero	Amount Requested: \$200,000
<i>Licensing Institution</i>	Miami (OH) University	Amount Recommended: \$0
Prior Phase 1 Applications: No	Prior Phase 2 Applications: No	<i>DC/DC Converter for Multirotor Aircraft</i>
Advanced Manufacturing		Entrepreneurs' Center

Company Snapshot: Volynt Aero plans to commercialize the Vyper aircraft, an unmanned, hybrid-electric, multi-mission aircraft for use in defense contested logistics, humanitarian disaster response and commercial mid-mile logistics.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
G	Management Team	Two of the primary leaders have been involved in the development since inception using non-dilutive funding. The third leader has demonstrated success in fund raising with prior business ventures. All 3 are currently active in raising Series A funding.
R	Opportunity/Market Size	TAM is difficult to define due to the unique nature of the market. Use of DoD and commercial resources suggests an initial market of ~\$1.4B. Value proposition for proposed integration not provided.
Y	Intellectual Property Protection	Background IP owned by Volynt. A U.S. Patent Application Provisional Application 27876.04051 (4873-5443-1954) was filed in July 2024. Volynt are working to license IP from Miami University.
Y	Proof of Concept	System technology is TRL 5, DC/DC converter will provide TRL 6. Performance metrics defined by field of use will demonstrate PoC.
G	Potential Investor/ Business Partner Engagement	Active discussions underway to secure \$28M Series A funding in 2025, with Series B planned for 2028.
R	Business Model	Initial focus is for the DoD market. FAA approval will open commercial market. The technology can be applied to new markets.
Y	Project Plan/ Budget Narrative	Completion within 12 months in absence of unforeseen delays.
Y	Growth Plan in Ohio	Projecting 50 jobs with revenues exceeding \$100M in 5 years.
Y	ESP Interaction	Working with The Entrepreneurs' Center, EIR in place.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
-------------------------	-------------	--------------	----------------

Comments and Recommendations: The management team is well qualified to continue product development and commercialization. The team is actively engaged in establishing manufacturing capability and raising funds to support future market penetration. While the addressable market size is difficult to fully quantify, further definition would aid future market focus. The benefits to be obtained by integration of the proposed technology into the existing product need to be clearly identified to support decisions on the roadmap for future product development.

TECHNOLOGY VALIDATION AND STARTUP FUND

Proposal 25-1853	WaterWise Technologies LLC	Amount Requested: \$200,000
<i>Licensing Institution</i>	Ohio State University	Amount Recommended: \$0
Prior Phase 1 Applications: Yes	Prior Phase 2 Applications: No	<i>Field-Scale Validation of Unmanned Surface Vehicle (USV) for Water Resource Management</i>
Biomedical/Life Sciences	Rev1	

Company Snapshot: WaterWise has built/field tested a prototype Unmanned Surface Vehicle (USV) for ultraviolet treatment of surface water to mitigate Harmful Algal Blooms (HAB) under prior TVSF Phase 1 funding. TVSF Phase 2 funding will evaluate an improved USV-UV in field testing.

Rating (R/Y/G)	Category	Highlights/Issues/Comments
R	Management Team	Proposal does not identify members of the project management team or the time commitment to the project for each with exception of CEO with projected 70% project time commitment.
R	Opportunity/Market Size	Surface water monitoring/treatment for HAB remediation/prevention is a recognized large market opportunity; however, proposal does not clearly delineate market segmentation and targeted revenue streams.
Y	Intellectual Property Protection	PCT application US2023/063556) filed in March 2023. Initial office actions are public.
G	Proof of Concept	Initial prototype USV built and field tested at TRL 6 with lab testing for UV HAB and toxin remediation completed with TVSF Phase 1 funds. No picture of prototype USV in the proposal.
Y	Potential Investor/ Business Partner Engagement	Early-stage identification and pursuit of public (SBIR) and private funding. Engaged with Delco Water, a non-profit water utility.
R	Business Model	Proposal has initial business model providing services transitioning to "lease to own". This is not reflected in pro-forma income statement.
R	Project Plan/ Budget Narrative	Local company to provide USV engineering under \$80,000 contract.
Y	Growth Plan in Ohio	Proposal does not give estimate of additional OH employment.
G	ESP Interaction	Comprehensive and extended engagement with Rev 1.
	Evaluator Recommendation	This application is not recommended for funding.

Evaluation Scale	Weak	Meets	Exceeds
-------------------------	-------------	--------------	----------------

Comments and Recommendations: Identities and time commitment of management team is not in the proposal. TAM/SAM by market segmentation, applications, and sources of revenue are not clearly identified in the proposal. Income statement does not clearly identify revenue sources (sales, service, lease). Summary of Milestones (Table 3) confounds equipment, personnel, and supply costs. Project Schedule (Fig 1) does not match Project Details (Table 3). Proposal suggests USV can provide the entire HAB treatment solution and does not address business impacts if other services are required.

4) Round 39 Analysis

Figure 1 shows the proposal activity and funding recommendations by technology source for Phase 2 proposals. There were three applications with technology from Ohio State University, two each from Air Force Research Laboratory and University of Cincinnati and one submission each from Naval Surface Warfare Center Carderock, Miami Ohio University, University of California Davis, Cleveland State University, University of Toledo, Nationwide Children's Hospital and the US Navy. Two applications each from Air Force Research Laboratory and University of Cincinnati are recommended for funding. One application from Nationwide Children's Hospital, the US Navy and Ohio State University are recommended for funding. The remaining seven are not recommended for funding.

Figure 1. Round 39 Funding by Technology Source

TECHNOLOGY VALIDATION AND STARTUP FUND

Figure 2 depicts Phase 2 proposal activity and funding recommendations by Third Frontier focus area. In this Round, five of fourteen proposals (36%) are in Biomedical/Life Sciences and Software/ Information Technology, three of fourteen (21%) are in Advanced Materials and one of fourteen (7%) is in Advanced Manufacturing. Three Software/ Information Technology and two each in Advanced Materials and Biomedical/Life Sciences are recommended for funding. Rounds 20 to 38 prior round average is 53% in Biomedical/Life Sciences.

Figure 2. Round 39 Phase 2 Proposal Activity by Third Frontier Technology Area

Figure 3 shows the aggregate ratings by evaluation criteria for all Phase 2 proposals. Excluding Growth Plan in Ohio and ESP Interaction, IP Protection followed by Project Plan/ Budget were the strongest categories in this Round. Business Model, then Team and Opportunity/ Market Size were rated as the weakest.

Figure 3. Round 39 Phase 2 Proposal Rating Summary

Figure 4 shows the percent meets or exceeds of the business model by Round. In the previous nineteen Rounds, business model was the lowest rating in Rounds 20-23 (53% average $\geq$ meets), Round 26 (28%) and Round 31 and 35 (50%). The RFP was revised to elicit stronger business models prior to Round 24, and it appears that the proposals have provided stronger business models in subsequent Rounds. Round 24 to 39 average is 68% average $\geq$ meets. The average over all 20 rounds is 65%. The two 50% average $\geq$ meets in Rounds 31 and 35 are concerning and will continue to be monitored closely over the next few Rounds.

Figure 4: Rounds 20 to 39 Phase 2 Analysis of Business Model

Figure 5 shows the percentage of Biomedical/Life Sciences applications for the last 20 Rounds. Round 39 represents 36% in Third Frontier Technology areas that are Biomedical/Life Sciences. Biomedical/ Life Sciences has been in the minority of the applications 7 times in the last 20 rounds. The overall average for the last 20 rounds is 53% of the applications in Biomedical/Life Sciences. The previous 19 Rounds average 54% Biomedical/ Life Sciences vs 36% this round. The lower percentage of Biomedical / Life Sciences in the last two rounds is associated with a majority of the applications involving the Entrepreneur's Center.

Figure 5: Rounds 20-39 Phase 2 Analysis of Biomedical/Life Science Focus

Carry Through and Reapplication

Phase 1 Carry Through: There were three Phase 2 applicant that previously received Phase 1 funding and one is recommended for funding.

There are two Phase 2 reapplications for the first time (or second application) and one is recommended for funding. There is one reapplication for the fourth time (2 separate projects) and it is recommended for funding.

5) Recommendations

Biomedical/ Life Sciences applications have been 50% or more of the applications in 13 of the last 20 rounds. It is recommended that continued outreach efforts be used to encourage more proposals in other Third Frontier Technology areas that reflect the diverse markets and economic activities in the State.

Appendix I

Summary of Redwood team and qualifications

Redwood, as a company, has been providing technology commercialization services for over 11 years while each team member has been active in this field for over 25 years.

Each Redwood team member

- possesses an advanced technical degree and extensive business proficiency
- has worked across the spectrum of technology commercialization from invention to successful market introduction
- understands how to assess a concept case from the perspective of aligning technologies to product applications in specific markets
- has lived, both conceptually and literally, the iterative process of understanding market needs and wants, value chains and who the customers are within the value chain

Team members have all worked for major corporations, research institutions, venture capital firms and technology start-up companies gaining a comprehensive understanding of what is necessary for development teams to successfully commercialize a technology. The Redwood team has served as evaluators for the Ohio Advanced Manufacturing program and an individual team member served as an evaluator for CALF, TIP and IOF loan programs for over a decade.

The six members of the Redwood team are highly qualified evaluators for the TVSF program and have combined experience and expertise in the following areas (combined years):

Commercializing technology into market pulled products (125+ years)

Market/Technology Assessment (140+ years)

Startup/ Spin out companies (50+ years)

Board member/Advisor to Startups (30+ years)

Evaluating/ monitoring RFPs/ Funding selection (40+ years)

The following is a brief summary of the six principal team members used in this evaluation Round.

Herb Bresler

- BS Biological Sciences, University of Maryland; BS Secondary Science Education, University of Maryland; PhD Immunology and Infectious Diseases, The Johns Hopkins University School of Hygiene and Public Health
- Former Senior Research Leader and Chief Scientist for Health and Life Sciences, Battelle Memorial Institute, responsible for evaluation of new technology-based business opportunities, intellectual property development, licensing and tech transfer; created and implemented new metrics to increase returns on discretionary R&D; cultivated approximately 1150 invention disclosures, 900 patent applications, and 120 granted patents, leading to \$52 million company funding
- Recipient of four R&D 100 awards for breakthrough medical devices in neuroscience and diagnostics
- Former Director of the Laboratory of Cellular Immunotherapeutics at the Arthur G. James Cancer Hospital and Research Institute at The Ohio State University

Jeff Crompton

- M.A., University of Oxford, UK, MS, D.Phil., University of Oxford, UK, Materials Science
- Founder and CEO, AltaSim Technologies LLC
- R&D Leader – EWI, Calgon Chemicals, Alcan International
- Developed innovative technology in aerospace, automotive and medical products
- Transferred technology into commercial production in Europe, North America and Asia
- Angel investor in Ohio based technology startups

John McArdle

- BE, Manhattan College, MS, Northeastern University, Chemical Engineering
- MBA, Finance / International Business, University of Chicago (Booth School of Business)
- Former Business Development Manager, Battelle
- Former Product Line Manager – Koch Industries
- Former Technical Sales Manager, Allied Signal Corporation
- Recognized expert in water and wastewater treatment technologies
- Successful track record of introducing innovative technologies for a variety of municipal, industrial, and military applications in domestic and overseas markets.

Jim Sonnett

- BS, University of Virginia, MS, University of Massachusetts, PhD, University of Delaware, all in chemical engineering
- Former Vice President – Science and Technology, Battelle Health & Life Sciences
- Former R&D Leader – W. L. Gore & Associates and E. I. DuPont

TECHNOLOGY VALIDATION AND STARTUP FUND

- Built and led high impact innovation organizations in aerospace, electronics, and life sciences
- Former Board Member – Velocys, Ventaira, Battelle Ventures
- Recipient of 3 R&D 100 awards.
- Distinguished Visiting Professor of Engineering and Applied Science, University of Virginia (Spring 2022)

Susan Stanton

- BS, Millersville University, Chemistry, MPh, Syracuse University, Organic Chemistry, PhD, University of Rochester, Organic Chemistry
- Personally developed 12+ products and led new product development teams at Mobay, Alcoa & Nexicor
- Holder of 10+ patents
- Former VP Market and Technology Assessment at the National Technology Transfer Center
- Founder and Principal SBCi Ltd.
- Over 15 years as an angel investor in technology-based startups
- Over 15 years as an evaluator for Ohio Third Frontier funds including IOF, CALF and TIP and Jobs Ohio
- Over 8 years teaching market and business analytics to STEM graduate and post doc students.

Bhima Vijayendran

- BS, University of Madras, MS, University of Madras, PhD, University of Southern California in Polymer and Surface Science, MBA, University of New Haven
- Former Senior Research Leader and Vice President Business Development, Battelle Memorial Institute; Chief Research Officer, Battelle Science and Technology, Malaysia
- Former Director, Discovery Research, PPG Industries
- Recognized as one of the leading authorities on advanced materials, special chemical and polymer systems in numerous markets including: Renewable and clean technology, Energy, Nano Technology and Industrial Products.
- Recipient of ten R&D 100 awards and over 100 patents and numerous other awards.

Appendix 2

TVSF objectives and phases

The Technology Validation and Start-up Fund (TVSF) provides grants under two phases to transition technology from Ohio Eligible Research Institutions into the marketplace through Ohio start-up companies. Under Phase 1, Ohio Research Institutions may apply for a pool of funds to support validation/ proof that will directly impact and enhance both the commercial viability of their unlicensed technologies and ability to support a start-up company. Under Phase 2, Ohio start-up and young companies may apply for funding to commercialize a technology they intend to license from a university or an Ohio research institution.

The goals of Phase 1 include:

- Generate the proof needed to move technologies to the point that they are either ready to be licensed by an Ohio start-up company or deemed unfeasible for commercialization. The institutions are encouraged to work with potential Ohio licensees to identify the proof needed.
- Perform validation activities such as demonstration and assessment of critical failure points in subsequent development, prototyping, scale-up and commercialization in order to generate this proof with strong preference for these activities being performed by an independent 3rd party source.

The goals of Phase 2 include:

- Accelerate the commercialization of technology by Ohio start-up companies that license technology developed at Eligible Institutions during the critical early stage of life of the company.
- Generate the proof needed to move technology to the point where it is able to be commercialized or additional funds for commercialization can be raised. A clearly identified path to subsequent funding opportunities and working directly with potential investors to define the proof needed for investment into the company is strongly encouraged.
- Funded activities may include, but may not be limited to, beta prototype development and deployment to potential customers for testing and evaluation and market research/ business development in order to generate the proof needed.

Based upon these goals, the proposal evaluation criteria were developed. The proposals were then evaluated based on the criteria.

Description of review process

Review summary. Our overall review process flow and outcomes by stage are shown in Figure 1. A similar process has been successfully used by Redwood in prior projects for public and private clients. Discussions were held with the TVSF program manager after all but the initial step in Figure 1.

Figure 1. TVSF Evaluation Process

Review and Assign Proposal In this first step proposals were summarized and a primary evaluator was assigned who has the appropriate background and no conflict of interest.

Stage 1 Evaluation Stage 1 evaluations were conducted for each proposal using the criteria shown below in Tables 1 and 2. Differentially weighted criteria were used to evaluate Phase 1 and Phase 2 proposals. Each proposal was rated on a 0 (absent) – 5 (Outstanding) scale for each criterion, an approach used by the NSF and in other State of Ohio programs. The weightings reflect the experience of the Redwood team and our belief that some factors, for example team and market opportunity in Phase 2, are more important than others.

The entire review team subsequently discussed all the evaluations to ensure consistency and agreed upon which applicants to invite for interviews. Interview questions were then provided in advance to each applicant.

TECHNOLOGY VALIDATION AND STARTUP FUND

Stage 2 Evaluations (Interviews) The standard procedure for this step is: In-person or Zoom (due to Covid restrictions), 45-minute interviews were held with each invited applicant to discuss the advance questions plus other topics of interest to the evaluators. A minimum of two Redwood team members participated in the interviews in person or Zoom with additional team members joining via conference call or Zoom. Interviews in this round were held via Zoom video conference call.

Integration and Quality Control Proposal evaluations were updated based on interview results. A calibration review was held by the review team to ensure that evaluations were performed consistently and that any changes made were a result of team consensus. Based on this review, proposals were recommended for funding.

Table 1 – Phase 1 Evaluation Criteria

Criterion	Weighting	Description
Alignment and Compliance	Go / No go	Institutional alignment with TVSF intent and compliance with RFP
Project Selection Committee	20	Skills, background and commitment of the committee members
Deal Flow; Budget Strategy	15	Is the projected deal flow consistent with the requested budget to enable committing funds within 1 year?
External Participation	15	Does process ensure validation activities will be performed by 3 rd parties; ESPs and state-funded programs/organizations are enlisted to enhance commercialization activities of the project?
Track Record	15	Is there a strong Phase 1 or comparable program track record of licensing and newco creation? If not, is there a plan for improvement?
Metrics	15	Realism and impact of proposed metrics, including licensing, start-ups.
Project Management & Experience	15	Is there a strong project management strategy and appropriate experience of people who allocate the pool of funds and manage individual projects?
Project Selection Process	5	Is there a clear, appropriate process for project selection?

TECHNOLOGY VALIDATION AND STARTUP FUND

Table 2 – Phase 2 Evaluation Criteria

Criterion	Weighting	Description
Alignment & compliance	Go / No Go	Proposal alignment with TVSF intent and compliance with RFP
Management Team	20	Skills, background and commitment
Opportunity / Market size	15	What is the market segment and total addressable market? Is it a platform or breakthrough technology or incremental improvement? If breakthrough, is it compatible with viable commercialization pathways?
IP Protection	15	Is IP adequately protected, does it enable the business model, is it differentiated from likely competition, is license likely within 9 months?
Proof of Concept	15	Was meaningful input from potential customers and key performance metrics used to design Proof of Concept? Are the competitive advantages compelling for potential customers?
Potential Investor / Business Partner Engagement	10	Is there company engagement / collaboration independent of licensing institution, including financial backing?
Business Model	10	Is the business model realistic AND achievable? Can the service / manufacturing model be scaled?
Project Plan / Budget Narrative	5	Is the budget consistent with proof in 1 year?
Growth Plan in Ohio	5	Does a start-up exist or is it planned? Will the start-up be in Ohio? Are growth plan details provided?
ESP Interaction	5	Is team engaged with ESP? Has team incorporated feedback from ESP into the project, proposal or business plan?
